COMPENDIUM
2003

National Park Service (NPS) regulations applicable to the protection and equitable public use of units of the National Park System grant specified authorities to a park superintendent to allow or restrict certain activities. NPS regulations are found in Titles 36 and 43 of the Code of Federal Regulations (CFR) and created under authority and responsibility granted the Secretary of Interior in Titles 16 and 18 of the United States Code. The following compendium comprises a listing of all NPS regulations that provide the Superintendent with discretionary authority to make designations or impose public use restrictions or conditions. The larger body of NPS regulations that do not provide discretionary authority to the Superintendent is not cited in this compendium. A complete and accurate picture of regulations governing use and protection of these units can only be gained by viewing this compendium in context with the full body of applicable regulations found in Titles 36 and 43 CFR. *Please write Western Arctic National Parklands, P.O. Box 1029, Kotzebue, Alaska 99752 or call (907)442-3890 for questions relating to information provided in this compendium.*

No conditions established at present (may require access permit).

13.17(e)(4)(i) Designated existing cabins, shelters or temporary facilities that may be shared for subsistence use without a permit

No designations at present. Subsistence uses of these facilities requires a permit from the superintendent.

No conditions or standards established.

13.22(c) Designate areas where personal property may not be left unattended for any time period, limits on amounts and types, manner in which property is stored

- All caches must be labeled with the name of the owner, home address, telephone number, and date that the cache was established. If the cache contains fuel, the type of fuel must be noted. Unlabeled caches may be removed or impounded.
- Caches left for more than 4 months will be considered abandoned and may be removed or impounded by Park Rangers.
- All caches must be secured in such a manner that wildlife is unable to access the cache contents.
- Fuel caches will be limited to no more than 30 gallons per registered owner, in each cache location.
- Fuel caches will be stored at least 100 feet from any water source, gravel bar, or flood plain. Fuel must be contained in a UL approved steel fuel container and placed on impervious material in such a manner that any spillage would be contained and prevented from coming into contact with water, soil or vegetation.
- A Special Use Permit may be obtained from the Superintendent for unique or special circumstances different from above. All such requests must be made in writing to the Superintendent at P.O. Box 1029 Kotzebue, AK 99752.

Unlabeled or undated caches are an indication that the owner has no intention of returning or retrieving the property. Experience indicates that caches older than 4 months are usually abandoned. Unlabeled fuel is of questionable use since fuel deteriorates with age. Fuel caches require special containers and handling because fuel spills can contaminate soil and water. Fluctuating river levels and unstable stream banks make streamside, gravel bar, and flood plain cache locations unsuitable.

This requirement allows the superintendent to establish terms and conditions for salvage operations as necessary to protect resources, provide for public safety, and minimize impacts on visitors.
